# DWITE '07 R5 #1 - I heart you

Time limit: 2.0s   **Memory limit:** 64M

DWITE Online Computer Programming Contest, February 2008, Problem 1

Just in time for Valentine's Day 2008, we require an ASCII heart generator. *Based on Tony's horrible "artwork" below*:

```
 ~.~
`    `
 \./
```

The input will contain 5 lines, integers $0 \le N \le 5$.

The output will contain 5 sets of 3 lines, 15 in total. Each set will have a specified number of hearts generated. Refer to the sample output for examples.

Note: each heart is made up of 3 lines, 5 characters each. Don't forget to have all the spaces at the end.

Sample Input

```
1
0
3
```

Sample Output

```
 ~.~
`    `
 \./

 ~.~  ~.~  ~.~
`    ``    ``    `
 \./  \./  \./
```
