

Mock CCC '18 Contest 2 J1 - An Arithmetic Problem

Time limit: 5.0s **Memory limit:** 1G

You are given an arithmetic expression $a + b = c$. Determine if it is true or false.

Constraints

$$1 \leq a, b, c \leq 9$$

In a batch of tests worth 1 mark, the answer is always `True`.

In a potentially disjoint batch of tests worth 1 mark, the answer is always `False`.

Input Specification

The first line contains a single line of the form `a + b = c`, where each of `a`, `b`, and `c` are positive digits.

Output Specification

If the statement is true, print `True` on a single line.

Otherwise, print `False` on a single line.

Sample Input 1

```
1 + 1 = 2
```

Sample Output 1

```
True
```

Sample Input 2

```
1 + 1 = 3
```

Sample Output 2

False
